

9th International Conference on Environmental Radioactivity--Xi'an, 2027

Sunday, September 12, 2027 - Friday, September 17, 2027

Xi'an'

Sessions

New challenges in the studies on environmental radioactivity

Recent developments in analytical technologies

Progress in environmental radioactivity studies

Radionuclides as tracers of environmental processes

Terrestrial radioactivity

Marine radioactivity

Radionuclides in climate change studies

Modelling of environmental processes

Radionuclide impact of nuclear facilities and their decommissioning on the environment

Progress in radioecology

Reference materials for environmental radioactivity studies

Other relevant topics
